Green Springs Animal Hospital Offers Grooming and Spa Treatments for Various Pets

FOR IMMEDIATE RELEASE

Braintree, Massachusetts, November 19, 2013 – Braintree’s Green Springs Animal Hospital announced the opening of their new Lake Wing, a portion of the hospital devoted to enhanced wellness and preventive medicine. The new wing will also offer grooming and spa treatments, both of which aim to improve overall pet health.

The on-site salon and spa in the new Lake Wing gives pet owners more access, control, knowledge and convenience for their pet’s treatment needs efficiently under the same roof. The salon and spa, located on the second floor just down the hallway and around the corner from the animal hospital, is dedicated to the comfort and safety of your pet. It offers the safest high quality grooming equipment available that’s capable of accommodating each pet in a clean, accessible and relaxed atmosphere. The 2500 square foot facility is outfitted with the latest and safest grooming equipment. A clipper vacuum system keeps the blades cool while removing clippings and dander. Hydraulic grooming tables with ramps can be lowered so pets of any size and age can walk onto the tables with ease.

“No need to worry about your pet being cooped up until his vet appointment, when he can lounge in one of our pet condos complete with large play areas and a special area for when nature calls,” said Janice Grayson, one of the qualified experience groomers on staff who was in charge of designing the facility’s floor plan. Dr. Denton, the senior veterinarian at the animal hospital, stressed the importance of proper pet grooming, which for many pets, is part of a comprehensive wellness approach and an important part of proper pet hygiene. Denton further added, “The success of treating any illness can hinge on early detection. Discovering skin conditions, preventing heat strokes, and providing basic comfort are just some of the health benefits of proper grooming.”

Qualified groomers on staff, trained in using natural calming techniques will be familiar with your pet’s medical history and personality to provide the best care and put your pet at ease. Proper grooming reveals rashes, tumors, fleas and ticks, ear infections and other issues that require veterinary attention and appropriate medical treatment. Pet owners need only walk their pets from the Lake Wing, down the hallway and around the corner to reach the animal hospital where a doctor and staff are waiting in a suite of modern examination rooms. The proximity of the salon and spa also makes it possible for Dr. Denton or an assistant to walk over and examine your pet if alerted to any health concerns to determine if immediate medical treatment is necessary. During our grand opening take advantage of 30% off a grooming session for your pet when buy one of our select pet pampering products.

Pet owners interested in learning more about the new Lake Wing, as it relates to the animal hospital and Dr. Eugene Denton, can visit the website at www.greenspringsanimalhospitalspa.com for **Green Springs Animal Hospital and Spa**.
